Technical Skills

- **Languages:** Java, JavaScript
- **Web Development:** HTML, CSS, Spring Boot
- **Database Management:** MySQL
- **Tools:** Postman, GitHub

Projects

Inventory Management System | Spring Boot, Thymeleaf, MySQL, Bootstrap

- Developed a comprehensive management system that streamline inventory management. The system includes features such as tracking book inventory, managing sales records and supplier coordination. Built using Spring Boot for the backend, Thymeleaf for the frontend, MySQL for database management, and Bootstrap for a responsive user interface, the system ensures efficient operations and ease of use.

Eblog Website | PHP, MySQL

- Collaborated with a team to develop “Otaku Blog” an anime-focused blog site using PHP. The platform allows users to register and log in, enabling logged-in users to comment on posts while regular users can only view them. To ensure content quality, user comments are published only after admin approval. The project emphasized teamwork and creating a secure, user-friendly platform for anime enthusiasts to engage and interact.
